

BENTON SCHOOL DISTRICT
CHROMEBOOK AND DEVICE USE AGREEMENT

Please read the entire document carefully. This agreement is made effective for general use of a Chromebook or Device at the school site and upon receipt of a 1:1 Chromebook or Device between the Benton School District (BSD), the student receiving a Chromebook or Device (“Student”), and his/her parent(s) or legal guardian (“Parent”). The Student and Parent(s), in consideration of being provided with a Chromebook or Device, software, and related materials (the “Chromebook and Device”) for use while a student is at Benton School District, hereby agree as follows:

1. EQUIPMENT

1.1 Ownership: BSD retains sole right of possession of the Chromebook or Device and grants permission to the Student to use the Chromebook or Device according to the guidelines set forth in this document. Moreover, Benton administrative staff retains the right to collect and/or inspect the Chromebook or Device at any time, including via electronic remote access; and to alter, add or delete installed software or hardware.

1.2 Equipment Provided: Efforts are made to keep all Chromebook and Device configurations the same. BSD will retain records of the serial numbers of provided equipment.

1.3 Substitution of Equipment: In the event the Chromebook or Device is inoperable, BSD has a limited number of spare Chromebooks or Devices for use while the original Chromebook or Devices are repaired or replaced. However, it cannot guarantee a loaner will be available at all times. This agreement remains in effect for such a substitute. The Student may NOT opt to keep a broken Chromebook or Device or to avoid using the Chromebook or Device due to loss or damage. Please note that if the Student forgets to bring the Chromebook or Device or power adapter to school, a substitute will not be provided except for unusual circumstances at the discretion of the teacher or administration.

1.4 Responsibility for Electronic Data: The Student is solely responsible for any non-BSD installed software and for any data stored on the Chromebook or Device. It is the sole responsibility of the Student to backup such data as often as necessary. BSD provides a means for backup along with directions but BSD does not accept responsibility for any such software.

2. DAMAGE OR LOSS TO EQUIPMENT

2.1 Insurance and deductible: BSD will not purchase insurance.

2.2 Responsibility for Damage: The Student is responsible for maintaining a 100% working Chromebook or Device at all times. The Student shall use reasonable care to ensure that the Chromebook or Device is not damaged. Refer to the Standards for Proper Care below for a description of expected care (section 4).

In the event of damage not covered by the warranty, the Student and Parent will be billed a fee according to the following schedule:

- First incident – up to \$100
- Second incident – up to \$150
- Third incident – up to full cost of repair or replacement (up to \$250)
- Fourth incident – full replacement cost (up to \$250) and additional consequences

*Screen replacement up to \$75

BSD reserves the right to charge the Student and Parent the full cost for repair or replacement when damage occurs due to gross negligence as determined by administration. Examples of gross negligence include, but are not limited to:

- Leaving equipment unattended and unlocked. This includes damage or loss resulting from an unattended and unlocked Chromebook or Device while at school. (See the Standards for Proper Care document for definitions of “attended,” “unattended,” and “locked.”)
- Lending equipment to others other than one’s parents/guardians.
- Using equipment in an unsafe environment.
- Using the equipment in an unsafe manner. (See the Standards for Proper Care document for guidelines of proper use).

2.3 Responsibility for Loss: In the event the Chromebook or Device is lost or stolen, the Student and Parent may be billed the full cost of replacement.

2.4 Actions Required in the Event of Damage or Loss: Report the problem immediately to the building principal. If the Chromebook or Device is stolen or vandalized while not at BSD or a school-sponsored event, the Parent shall file a police report.

2.5 Technical Support and Repair: BSD does not guarantee the Chromebook or Device will always be operable, but will always make technical support, maintenance and repair available.

3. LEGAL AND ETHICAL USE REGULATIONS

3.1 Monitoring: BSD will monitor Chromebook or Device use using a variety of methods – including electronic remote access – to assure compliance with BSD’s Legal and Ethical Use Regulations.

3.2 Legal and Ethical Use: All aspects of BSD Chromebook and Device Use Agreement remain in effect, except as mentioned in this section.

3.3 File---sharing and File---sharing Programs: The installation and/or use of any Internet-based file-sharing tools are explicitly prohibited. File-sharing programs and protocols may not be used to facilitate the illegal sharing of copyrighted material (music, video and images).

3.4 Allowable Customizations: The Student is permitted to alter or add files to customize the assigned Chromebook or Device to their own working styles (i.e., background screens, default fonts, and other system enhancements).

3.5 Copyright Laws: The Student will not duplicate or distribute copyrighted materials other than a backup copy of those items the Student legally owns.

4. STANDARDS FOR PROPER CHROMEBOOK AND DEVICE CARE

4.1 Student Chromebook and Device Program Acknowledgement Form: The Student is expected to follow all the specific guidelines listed in the Chromebook and Device Use Agreement herein, and take any additional common sense precautions to protect their assigned Chromebook or Device. These same rules apply to loaner and stationary Chromebook and Devices used on the school premises. Loss or damage resulting in failure to abide by the details below may result in full---financial responsibility. Parents and the Student must sign the Student Chromebook and Device Program Acknowledgement Form prior to receiving their assigned Chromebook or Device. Read the electronic manual that comes with the Chromebook or Device stored within each individual Chromebook or Device. Following advice and the standards below will lead to a Chromebook or Device that will run smoothly and serve as a reliable, useful and enjoyable tool.

4.2 The Student’s Responsibilities

- Treat the equipment with as much care as if it were your own property.
- Bring the Chromebook or Device charging unit to BSD every school day. (If the Student forgets his/her equipment, substitutes will NOT be provided, except for unusual circumstances at the discretion of the teacher or administrator).
- Keep the Chromebook or Device either secured (i.e., home or other secure place where others do not

have access) or attended (with you or within your sight) at all times. Keep the Chromebook or Device stored in a secure place (i.e., locked in a locked locker or other suitable place) when the Student cannot directly monitor it. For example, during athletic events, games, practices and trips, store the Chromebook or Device in a secure place assigned by your coach/sponsor and arrange to return to school to retrieve it after the activity. It is “best practice” to leave the Chromebook or Device in the Student’s issued locked locker. Chromebooks or Devices left in bags and backpacks, or in unattended classrooms are considered “unattended” and may be confiscated by school personnel as a protection against theft. Unattended and unlocked equipment, if stolen – even at school – will be the Student’s full financial responsibility.

- Avoid use in situations that are conducive to loss or damage. For example, never leave the Chromebook or Device in school vans, in the gym, in a locker room, on playing fields, in the care of another student/teacher, or in other areas where it could be damaged or stolen. Avoid storing the Chromebook or Device in a car for long periods of time. *Avoid leaving the Chromebook or Device in environments with excessively hot or cold temperatures. If the Chromebook or Device must be stored in a car for a short period of time, it must be kept out of plain view to avoid theft.
- The Student will keep the Chromebook or Device lid fully closed whenever it is moved from one point to another.
- The Chromebook or Device is to be used only by the assigned Student. The Student’s parents or guardians also are granted access to use the Chromebook or Device. Loss or damage that occurs when anyone else is using the Chromebook or Device will be the Student’s full responsibility.
- Adhere to BSD Chromebook and Device Use Agreement at all times and in all locations. When in doubt about acceptable use, ask the Technology Instructional Facilitator, Technology Coordinator, or your Building Principal.
- Regularly backup all necessary data stored on the Chromebook or Device. Never consider any electronic information safe when stored on only one device.
- Read and follow general maintenance alerts from school technology personnel.
- The Student understands their issued Chromebook or Device is subject to random checks and he/she will be responsible to maintain a Chromebook or Device that hosts data and materials deemed appropriate by school administration.

4.3 How to Handle Problems

- Promptly report any problems to a teacher or building principal immediately.
- Don’t force anything (e.g., connections, popped-off keys, etc.). Seek help instead.
- When in doubt, ask for help.

4.4 General Care

- Do NOT attempt to remove or change the physical structure of the Chromebook or Device, including the keys, screen cover or plastic casing. Doing so will void the warranty, and families will be responsible for 100 percent of the repair or replacement cost.
- Do NOT remove or interfere with the serial number or any identification placed on the Chromebook or Device.
- Do NOT do anything to the Chromebook or Device that will permanently alter it in any way. (The Student can apply identifiers to the Chromebook or Device so long as they are completely removable.)
- Keep the equipment clean. For example, avoid fingering the screen and NEVER eat or drink while using the Chromebook or Device. *Note: The warranty does not cover damage to the Chromebook or Device due to exposure to bodily fluids, blood borne pathogens or nicotine smoke.

4.5 Carrying the Chromebook or Device

- Always completely close the lid and wait for the Chromebook or Device to enter Sleep mode before moving it, even for short distances. Movement while the Chromebook or Device is on can result in permanent damage to the hard-drive and therefore the loss of all data. Sleep mode is sufficient-there is

little reason to actually shut down the Chromebook or Device other than on an airplane or during extended days of inactivity.

- We recommend the Student carry the Chromebook or Device inside their normal school pack. Simply slide the Chromebook or Device in and out while leaving the case within the school pack. Do not overstuff the Student pack-extreme pressure on the Chromebook or Device can cause permanent damage to the screen and other Chromebook or Device components.
- Do not grab and squeeze the Chromebook or Device, as this can damage the screen and other components.

4.6 Screen Care

The Chromebook or Device screen can be easily damaged if proper care is not taken. Broken screens are NOT covered by warranty and can cost up to \$75 to replace. Screens are particularly sensitive to damage from excessive pressure.

- Do not touch the Chromebook or Device screen with anything (e.g., your finger, pen, pencil, etc.) other than approved Chromebook or Device screen cleaners.
- Clean the screen with a soft, dry anti-static cloth or with a screen cleaner designed specifically for LCD type screens. See your Technology Instructional Facilitator, Technology Coordinator or Building Principals for assistance in cleaning your Chromebook or Device properly. The school supplies cleaning materials and special cleaning cloths.
- Never leave any object on the keyboard, i.e. pens, pencils, and papers with staples left on the keyboard are guaranteed to crack or severely scratch the screen when the lid is closed, thus resulting in a charge of up to \$250 to the family.

4.7 Battery Life and Charging

- Arrive at school each day with a fully charged battery. Establish a routine at home whereby the Student takes responsibility to charge the Chromebook or Device overnight.
- Avoid using the charger in any situation where the Student or another is likely to trip over the cord. Don't let the battery completely drain. Immediately shutdown if the Student is unable to connect to a charger.
- Close the lid of the Chromebook or Device when it is not in use, in order to save battery life and protect the screen.

4.8 Personal Health and Safety

- Avoid extended use of the Chromebook or Device resting directly on the lap. The bottom of the Chromebook or Device can generate significant heat and therefore cause temporary or permanent injury. Use a barrier such as a book or devices made specifically for this purpose when working with the Chromebook or Device on the lap. Also, avoid lap based computing while connected to the power adapter, as this will significantly increase heat production.
- Avoid lengthy use involving repetitive tasks (such as typing and use of the track pad). Take frequent breaks from using the Chromebook or Device as well as alter your physical position (typing while standing, sitting, leaning, etc.) to minimize discomfort. If possible, set up a workstation at home that allows the Student to situate the screen at eye level and the keyboard at lap level.
- Read the safety warnings included in the User Guide.

5. EQUIPMENT LENDING INFORMATION

This additional agreement allows students, under the supervision and discretion of the building principal and classroom teacher (or activity sponsor/coach), to check out a variety of peripheral equipment such as still cameras, video cameras, microphones, drawing tablets and other audio visual devices for multimedia school projects. The signed agreement is part of the Student Chromebook and Device Program Acknowledgement Form. The BSD grants the user permission to borrow technology equipment for school and home use based on mutual agreement of the following:

5.1 Agreements

- The Student received authorization from the Building Principal and teacher/sponsor/coach and filled out the Equipment Lending Sign-out Form filed in the office with the building's secretary.
- The Student will return the equipment on the established due date and times. It will be understood the Student will be billed for replacement costs if equipment is not returned or returned promptly. Approximate replacement costs for Chromebook or Device is \$250. The Student will treat this equipment with the same care as if it were their property.
- The Student will maintain the equipment in clean condition.
- The Student will avoid use of the Chromebook or Device in situations that are conducive to loss or damage.
- The Student will heed general maintenance alerts and advice from school technology personnel.
- The Student will promptly report any malfunctions, loss, damages or theft to the Building Principal, Technology Coordinator, Technology Facilitator or the classroom teacher/sponsor/coach.
- The Student will always transport the equipment within the case provided whenever leaving the school premises or when the Chromebook or Device is not in use.
- The Student will adhere to BSD Chromebook and Device Use Agreement and Conduct Rules when using peripheral equipment at all times and locations.

5.2. Damage or Loss

The Student is responsible for any costs incurred due to loss or damage of equipment as determined by the school. The Student understands that if they violate the above, they may not be permitted to checkout school equipment in the future and may be billed for any costs incurred by the school.

6. VIDEOS, PICTURES, DISCUSSION AREAS, PUBLISHING ON THE SCHOOL NETWORK

6.1 Use of Teacher Web Tools for Learning

While enrolled at BSD, the Student will have access to the teachers' course management system such as Google Classroom, Seesaw, or Schoology. Teachers will create a variety of blogs, wikis, discussion boards, posts, emails, and activities in support of academic growth. BSD's primary use of Schoology or other course management systems and web tools is for academic purposes only. Schoology, like other course management systems, allows the academic community to use social networking to interact with learning content, student peers, resource persons, and teachers. As such, students are expected to use assigned social networking areas as a learning tool and not for unrelated communication and gossip. As always, classroom teachers and administration will monitor all networking activities for appropriate use. BSD CSD will comply with the Federal Trade Commission's COPPA (Children's Online Privacy Protection Act) for students under the age of 13.

6.2 School Sponsored Pictures, Video and Chat Logs

- The Student and their parents must indicate on the Student Chromebook and Device Acknowledgement Form if they wish to prohibit the direct use of video, pictures, or chat logs for school news and professional development of teachers and staff. Place an "X" on the acknowledgement form if the Student is NOT to participate in the public recognition of their work created through school activities or assigned school projects. Student work will be solely shared to serve the purpose of improving our school and public relations by promoting the positive image and work of the teachers and students within the school.
- The Student is not to create their own activities or events on the school district's technology network without consent and direction of the classroom teacher and Building Principals.
- The Student is not to ask for or send photos of other students without consent and direction of the classroom teacher and Building Principals.
- The Student is not to ask for personal information about other students. Examples include but are not

limited to: email address, phone number, home address, and physical description. This section is not intended as a comprehensive list. The student handbook and school board policy may apply for disciplinary consequences including limited access to network services and loss of Chromebook or Device privileges if there is a violation. Other students conduct rules and policies may apply.

7. Chromebook and Device USE AND CONDUCT RULES

7.1 General Information: The primary goal of BSD's available technology is to enrich the learning that takes place in and out of classrooms. In particular, technology offers opportunities for exploration and analysis of academic subjects in ways that traditional instruction cannot replicate. However, certain legal and ethical restrictions apply. Also, the limited supply of both hardware and software requires us to set priorities for use. Academic work for courses always takes priority over any other use of the Chromebook or Device equipment. Chromebook or Devices provided in the Media Center and other computing centers located in the school building equipment are reserved exclusively for academic use. The following is a list of rules and guidelines, which govern the use of BSD Chromebook and Device and network resources.

7.2 Network Resources: Network services refers to all aspects of BSD's owned or leased equipment, including Chromebook and Devices, printers, scanners and other peripherals, as well as email, Internet services, servers, network files and folders, and all other technology related equipment and services. These rules apply to any use of BSD's network resources whether this access occurs while on or off the school premises.

7.3 Prohibited Acts: The Student may not use network resources:

- to circumvent the school districts filter to access sites not approved.
- to create, send, access or download material which is abusive, hateful, harassing or sexually explicit;
- to download, stream or listen to Internet based music, video and large image files not required for school work, as this slows the performance of the network for all users. The school will monitor the network for violations.
- to alter, add or delete any files that affect the configuration of a school Chromebook or Device other than the Chromebook or Device assigned for personal use;
- to conduct any commercial business;
- to conduct any illegal activity (this includes adhering to copyright laws);
- to access the data or account of another user (altering files of another user is considered vandalism);
- to install any software onto BSD Chromebook or Device to copy BSD school software (copying school owned software programs is considered theft).

In addition, students may not:

- give out their home address or phone number to anyone on the Internet (this protects users from becoming potential victims of those with criminal intent);
- give password(s) to anyone;
- post anonymous messages;
- forward email commonly known as "SPAM," Unsolicited Commercial Email (UCE), or "junk email."

7.4 Responsibility for Property: The Student is responsible for maintaining a 100 percent working Chromebook and Device at all times. The Student shall use reasonable care to be sure the Chromebook or Device is not lost, stolen or damaged. Such care includes:

- Not leaving equipment in an unlocked car or unlocked home.
- Not leaving equipment unattended or unlocked while at school or elsewhere.
- Not lending equipment to anyone.
- Not using equipment in an unsafe environment.

The Student must keep the Chromebook or Device locked (i.e. locked in your school locker, home or secure place where others do not have access) or attended (with the Student or within the Student's sight) at all times. Chromebook or Devices left in bags or backpacks or in unattended classrooms are considered "unattended" and

may be confiscated by faculty or staff as a protection against theft. If confiscated, the Student will receive a warning before getting the Chromebook or Device back. If the Chromebook or Device is confiscated a second time, the Student may be required to get a parent signature acknowledging financial responsibility before getting the Chromebook or Device back. Unattended and unlocked equipment, if stolen – even at school – will be the Student’s responsibility.

7.5 Discipline Any student who violates these rules will be subject to disciplinary action.

7.6 Legal Issues and Jurisdiction Because BSD owns and operates the equipment and software that compose our network resources, the school is obligated to take steps to insure that all facilities are used legally. Hence, any illegal use of network resources is prohibited. All content created, sent, accessed or downloaded using any part of BSD’s network resources are subject to the rules stated in this policy. School administration monitors our network and may find it necessary to investigate electronic incidents even if they happen after hours and outside of school. As the owners of our network resources, including email system, the school administration reserves the right, if needed, and at its discretion, remotely access, to open, examine and/or delete electronic files that violate this Chromebook and Device Use Policy.

7.7 Disclaimer The BSD does not have control of the information on the Internet or incoming email, nor does it provide any technical barriers to account holders accessing the full range of information available. Sites accessible via the Internet may contain material that is defamatory, inaccurate, abusive, obscene, profane, sexually oriented, threatening, racially offensive, illegal or otherwise inconsistent with the mission of the Benton School District. While BSD’s intent is to make Internet access available for educational goals and objectives, account holders will have the ability to access other materials as well. At BSD, we expect students to obey the Chromebook and Device Use Agreement when using the Internet. Students found in violation of the policy will be disciplined. In addition, BSD account holders take full responsibility for their access to BSD’s network resources and the Internet. Specifically, BSD makes no warranties with respect to school network resources nor does it take responsibility for:

- the content of any advice or information received by an account holder;
- the costs, liability or damages incurred as a result of access to school network resources or the Internet; any consequences of service interruptions.

Please contact the Building Superintendent for any questions regarding the Chromebook and Device Use Agreement.

END OF CHROMEBOOK AND DEVICE USE AGREEMENT
